

AUGBURG UNIVERSITY

We visited Augburg University in our Erasmus + experience. We had an interesting day. We prepared in different teams a lot of displays for our presentation in german high school Justus von Liebing Gymnasium. We share different point of view with our european classmates.

SHARING DIFFERENT POINT OF VIEW AND APPS

We knew a new university app. They want to be able to know the properties and qualities of food from a picture. They want a commitment to food health, responsibility about what we eat, what it is and where it comes from. It's very important for our project about Urban Development

WÜRZBURG UNIVERSITY

Our second day in Würzburg in our Erasmus + experience was in Würzburg University. We had an interesting day. We share with Croatian, Italian and German students two displays explaining what are the origins and causes of the greenhouse gases.

CLEAN ENERGY, GREENHOUSE GASES AND PHYSICS EXPERIMENTS

We made teams for a roleplay experience where we think about what is the best way to save energy if I was a businessman, family or mayor of our city, etc. And we made a debate about it..

We made an university masterclass about energy and physics experiments in a university lab.

Experiencia Erasmus

Dentro del programa de acogida Erasmus+ en la que hemos participado este curso, los alumnos del Instituto bávaro de Justus von Liebing Gymnasium de Augsburgo compartieron su experiencia dentro del Proyecto Europeo, Erasmus+, que se centraba de sostenibilidad en los hábitos de consumo.

**¿Cuanta agua
se consume
para fabricar
unos
vaqueros?**

Los alumnos alemanes pasaron por las clases explicando, en inglés, su experiencia, ya que han recorrido varias ciudades europeas dentro del proyecto Erasmus que tienen en vigor. Compartieron sus vivencias en otros países. En el patio realizaron una actividad sobre reciclado de plástico con nuestros alumnos.

ROTHEMBURG

Our first Erasmus + experience was in Germany, and we started visiting Rothemburg, an amazing and beautiful medieval Bavarian city. We woke up early in the freeze morning, with -2 grades of temperature.

And our first activity was a gymkhana in a small group, each group had Spanish, Italian, Croatian and German students.

**EXPLORE,
SHARE AND
DISCOVER.**

The night felt down so soon. Half of us were in the Torture Museum and the other part we had a walkingtour with guide.

When we went to the hostel we knew a new people. And we share funny moments in a small groups. We play cards with Italian people, and we started to talk with Croatian and German about worries and hopes of this Erasmus+ experience.

WÜRZBURG I

Our second main in our Erasmus+ experience was in the south Bavarian city of Würzburg. Another freeze day in Germany, we were in -6 grades of temperature. Our walking Tour with guide was while it's falling snowflakes. This morning was exotic and hard for everybody, specially for Italian and Spanish students.

**WALK IN THE
FOREST AND
NEW FRIENDS.**

We made part of our Project Step2Hogar, working out on our conclusions. We discovered an amazing Library with Podcast Lab and film workshop with green screen. We were creating new friendship with students from other nationalities, speaking in english everytime, and enjoying of this wonderful experience.
